***Allowable Subject Matter***

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not anticipate nor render obvious the invention of a hydro-mechanical transmission with a pump driven by a prime mover, a motor hydraulically connected to the pump and having a hollow motor shaft, a planetary gearing have first, second and third elements, coaxial with the motor shaft, wherein the first element is driven by the motor shaft, the second element driving the front wheels of the vehicle, and the third element driving the rear wheels of the vehicle and differentially connected to the second element through the first element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Prior Art Discussed***

The examiner has considered the references cited by applicant in his Information Disclosure Statement filed July 28, 2003. None of the references show all of the features of the claimed invention. In particular, neither of them show a hollow motor output shaft.

The references cited by the examiner are deemed pertinent to applicant's disclosure. Mark '025 does not show a hollow motor output shaft. Ebert '998 is not four wheel drive.
